

Students graph a linear equation and compute the x- and y- intercepts (e.g., graph  $2x + 6y = 4$ ). 1A6.0

165. What is an equation of the line shown in the graph above?

- A  $y = -\frac{3}{2}x + 3$
- B  $y = -\frac{2}{3}x + 2$
- C  $y = \frac{3}{2}x - 3$
- D  $y = \frac{2}{3}x - 2$

166. Which of the following is the graph of  $y = \frac{1}{2}x + 2$ ?
